Who We Are

Pre-school 3-5 years Elementary 6-10 years

Kendale is a small but dynamic school which provides a safe, supportive and caring environment where a dedicated staff guides children towards the acquisition of knowledge, skills and confidence, the necessary foundations for a life-long love of learning.

*English mother tongue teachers

*Class sizes 9-16

*Strong Italian language programme (preparation for 5th Grade Italian State examinations)

*Introductory French from the age of 7 years (2nd Grade)

*Emphasis on traditional values

*Creativity in music and art encouraged

Our Philosophy

Academic progress is, of course, of supreme importance and we at Kendale believe that is best achieved in a warm, caring and non-institutional atmosphere where feelings of security and self-confidence facilitate the learning process.

We believe it is important to strengthen the ties between family and community values with special emphasis on the value of respect for others as well as for oneself.

Kendale's happy family environment ensures that the child is never "lost in the crowd" but is nurtured emotionally and intellectually by a qualified and loving staff.

Parent-Teacher Co-operation

Parents are welcome to visit and observe at any time and their help and participation in school activities are always appreciated.

Staff

All classroom teachers are fully qualified and have English as their mother tongue.

Our teachers are enthusiastic and dedicated. They are skilled in devising a variety of stimulating and carefully prepared approaches to the many topics and activities which comprise the curriculum.

They understand the importance of encouraging the children's natural curiosity and of helping them to freely express their personalities within the framework of each assignment.

Curriculum

Languages

Children who frequent international schools today are the international citizens and potential leaders of tomorrow. It is therefore essential for these children to gain the linguistic freedom that leads to insight and flexibility in the understanding of other cultures. To meet this need, Kendale, in addition to its strong English programme, provides a comprehensive course in Italian language and also offers an introductory French language course for children of 7 years and over. Reading and writing in English are begun at about age 5.

Mathematics

The mathematics programme not only includes thorough training in basic skills, but encourages flexibility of thought and the openness to different approaches in problem-solving situations. Investigation and deduction as well as the application of mathematical concepts to practical experience are strongly emphasised.

Social Studies and Science

History, Geography and Science are treated as exploration and discovery subjects with as much integration across the curriculum as possible. For the 8 - 10 year old children the focus in history is on Mediterranean studies.

Field Trips

Much use is made of Rome's rich cultural environment, museums, historical monuments, art galleries, etc. Every year, as an extension of their Social Studies programme, the 9 and 10 year olds go on a trip either to Greece or to Florence.

Music and Movement

At Kendale each child is guided towards developing a close, personal relationship to music. The programme is based on the Delcroze method which develops each child's innate musicality and creativity through spontaneous and active participation. The programme includes singing, folk dancing, rhythmic and creative movement as well as technique and improvisation with percussion instruments.

Art

Art and handwork are an important part of the curriculum. The programme includes free expression and experimentation as well as the introduction of new techniques.

Art Week

Is an exclusive feature of Kendale School. For one week children of 7 years and older lay aside their regular programme and immerse themselves in art and handwork activities. Parents and teachers co-operate in setting up various centres and workshops and the children are free to organize their own time as they carry through the projects of their choice.
